This internal reprogramming action transfers \$4.0 million from the Operation and Maintenance, Army, 03/03, appropriation to the Research, Development, Test, and Evaluation, Army, 03/04, appropriation for proper execution. This action uses general transfer authority pursuant to section 8005 of Public Law 107-248, the DoD Appropriations Act, 2003, and section 1001 of Public Law 107-314, the Bob Stump National Defense Authorization Act for FY 2003. This action does not change the purpose for which the funds were originally appropriated. It meets all administrative and legal requirements of the Congress, and the Congress has not denied any of the funds.

Explanation: These funds will be used to continue development efforts that began in FY 2002, to include purchasing system components, integrating the components and testing the integration through a demonstration effort to determine if there is utility for Army use.

FY 2003 REPROGRAMMING DECREASE: -4,000

Operations and Maintenance, Army, 03/03

Budget Activity 1: Operating Forces

-4,000

Explanation: The Congress provided an additional \$4.0 million to the Operation and Maintenance, Army appropriation for Camera Assisted Monitoring System (CAMS) to be used "only for" a demonstration of the capability and effectiveness of the system. The CAMS is a mobile surveillance system with the ability to deploy, monitor and transmit intelligence data in a high threat environment. While most of the components are commercially available off-the-shelf items, one component, the uncooled thermal imager, is still under development. In addition, the integration of all the components has not been demonstrated. This program should be funded with Research, Development, Test and Evaluation, Army (RDT&E, A) appropriation; therefore, this reprogramming action transfers the funds accordingly for proper execution.
